Steele Rubber Products Announces

## **Specialty Windshield Gaskets**

Steele Rubber Products offers a specialty line of front windshield gaskets for street rods and customized vehicles regardless if the top is chopped or modified in any way. Steele offers standard stock front windshield gaskets for many years and models with or without the divider bar intact, as well as specialty gaskets for customized windshields that have the stock divider bar removed. These weatherstrips are available either with or without the perimeter chrome reveal molding being used also.

These items join Steele's inventory of hundreds of high quality windshield gaskets for most American made cars and trucks. All of these gaskets are constructed of the highest quality heat and ozone-resistant rubber compounds with molded corners as required. This close attention to detail and construction ensures their parts fit correctly and perform great. Steele stands behind their products with a money-back guarantee.

### **Ordering Information:**

Please call for availability  
Price varies based on make/model
